# Effects of Pornography

In November of 2004, a Senate subcommittee hearing took place in which a panel of experts testified about the ill affects of pornography.

Experts likened pornography to cocaine because of the similarities in effects both have on the brain.

# Addictiveness of Pornography

Pornography industry supporters claims pornography addiction to be a myth. Where pornography differs is that once the user becomes addicted and eventually overcomes the addiction, the pornographic images stay within the brain for the rest of the user's life.

# Advice for Parents

Since the largest group of Internet pornography users are of the ages between 12-17, it is important to have a talk discussing the dangers of pornography. Openly and candidly discuss the spiritual and psychological damage that pornography causes with your children.

Place computers in areas in which they are clearly visible within the house.

Don't allow Internet browsers that have private browsing modes, such as Safari. These modes allow the user to browse the web without the history ever being logged.

## Advice for **Parents**

Install website filters on computers that block out inappropriate websites.

Take advantage of cable companies' parent-control settings that allow parents to block programs based on their ratings.

## **Masturbation**

It is unanimously agreed that masturbation is haraam, as it is considered an un-natural form of sexual expression, in spite of what modern psychologists say.

# Masturbation

Also the hadeeth has stated that if the body truly needs to relieve itself it will do so in a wet dream which is the bodies natural way of relieving the sexual pressure.

## After-effects of Masturbation

- The nervous system is affected the most.
- Besides the heart, the digestive system, the urinary system as well as the other systems are adversely affected and consequently

# After-effects of **Masturbation**

- the whole body becomes the museum of diseases with profound weakness.
- The eyes become sunken, the cheek bones protrude and there is a black rim round the eyes.
- Continuous headache and backache.
- Dizziness and loss of memory.
- Palpitation of heart on lightest exertion.

# After-effects of Masturbation
